Unit 3: Exploration and Colonization

SS8H1b, SS8H1c, SS8H2, SS8G1d

Griffith-Georgia Studies
This unit will focus on the geographical, political, social and economic factors that contributed to Georgia’s colonization. Students will understand that production, distribution, and consumption of goods and services were an essential part of the economic motivation behind European movement and migration that led to colonial development. Students will learn that through conflict and change various groups and individuals had unintended results on the Native American culture while at the same time building a new culture of their own. They will also come to know how location and economic ideas are related.
